Bids to Be Opened Today

Bids for fuel oil for naval purposes and for the merchant marine will be opened by the government today. It is expected that there will be some new bidders and that there would have been at least but for the rumors that the government had confiscated Osage oil, but since this rumor was given such widespread publicity the chances are that the oil men will be in no humor to bid on anything else.

However there may be enough bids and at prices that are fair and reasonable to stop all further talk on the part of government officials that it is expected that there will be some new bidders and that there would have been at least but for the rumors that the government had confiscated Osage oil, but since this rumor was given such widespread publicity the chances are that the oil men will be in no humor to bid on anything else.

The above is just a sample of statements made yesterday by persons in oil producing areas by persons who earn their livelihood by drilling for oil. It looks like even a threat had set them all by the ears.

Rochester, T. Y., Financiers Here the 19th

A large party of Rochester, New York, financiers will arrive in Tulsa Friday March 19 and will inspect the properties of the Gladys Belle oil company and will view the oil fields in many instances for the first time.

Rochester is such a large city and is so prominent in business affairs of the Empire state as to make it an unusual event that so many of its business men are coming to Tulsa. For many years Rochester has been the home of one of the leading refineries in the world manufacturing petroleum interesting oil, but it may be a great trip and a mighty interesting one that these business men will enjoy in coming out to the mid-continent field.

While quite a number of the Rochester contingent are investment bankers, there are a great many of them who are prominent financial experts and capitalists and A. L. Johnson, of the H. W. Noble & Co. firm of investment bankers in Detroit, who heads the delegation, can feel truly proud of his success in bringing so many men that are prominent with him on this trip.

The list includes from Rochester, John Fullreder, Charles A. Elwood, William C. Mulley, Charles E. Edwards, Eugene G. Sackett, Donald Paragie of the Rochester Herald, Louis Minzer, Thomas W. Richardson, Herbert S. Myers and James M. Carles, P. J. Wilson of the Brookport Democrat and Henry E. Miller from the same city, H. L. Kelly and James J. Wylye of Tulsa, New York, Louis G. Siegel and Samuel E. Walker from Palmyra, W. V., Cleveland of Mt. Morris, and William P. Hobel of Buffalo.

From New York city there will be included in the roster H. R. Doughty, John W. Sherman, George N. Corrigan, James Cherry, Charles L. Scott, Louis C. Scott, Milton Meyer & Co., George A. Green, and from Michigan Arthur L. Walker of the Three Rivers, White from Detroit, W. H. Martin, S. Martin, Elmer Sprague, Commodore T. M. Owen and J. H. Porter.

The Gladys Belle oil company, whose properties are being visited, is one of the rapidly growing concerns and has 17 wells now drilling, and may be fortunate enough to have some completions while the party is here. The Gladys Belle has gone to great proportions under the able guidance of G. C. Stebbins and is one that everyone who has the interests of the oil business at heart, is justly proud.

The party will visit all the Gladys Belle properties including those at Bell, India and near Tulsa, and should certainly see the great layout the Gladys Belle has in the south east of Holden.

Everybody Sore

Even though the report that the government has been concerned over the oil men in Tulsa, they are not thoroughly convinced as to make this one particular subject the center of all interest wherever oil men are congregating. As for instance, Senator Gore writing C. J. Wrightson says:

"Have consulted the naval department this morning. No order has been issued taking over the present oil wells for oil will be opened tomorrow. The future policy may depend upon these wells. For my own part I should regard such a policy as that announced in the morning paper as most unwise, unjust and confiscatory in character. Will you further if there are other further developments?" On which Mr. Wrightson gives out the following:

"When a great government attempts such an asinine policy to

Interesting Wildcat Test

Reported by The World.
OKMULGEE, March 15.—A wildcat test of unusual interest and importance is just being started by Lyons Petroleum Company of Oklahoma in the center of a block of 2,000 acres of leases of the northeast of 14-17-8, one mile west of Holdenville. This test will go to 4,000 feet unless production is encountered above that point.

A rig which has just been completed in California cost \$1,000 per foot in height. The six stages cost \$6,000 to build and contains 36,000 square feet of lumber. The coring, which were made to order, cost \$1,000. There is a subsoil 16 feet deep beneath the floor of the rig and the well will start with a 20-inch hole which will be run for 128 feet.

The tools of the Lyons company, it is estimated, will cost \$1,000. This test is a mile and a half southeast of the celebrated Penn West mystery well which caused great interest in 1915. The Penn West well was drilled into pay deep sand and made several sensational finds. It caused great excitement among oil men and by men who earn their livelihood by drilling for oil. It looks like even a threat had set them all by the ears.
